

Contain Pain

Introducing ActiVessel a better treatment for your patient's chronic pain.

Opioid free pain management

Introducing ActiVessel a new non-invasive treatment for chronic pain combining ultrasound with electric field stimulation. (CUSEFS)

Now you can unlock the full power of therapeutic ultrasound with ActiVessel

YOUR POST ACUTE CARE FACILITY CAN NOW SUCCESSFULLY TREAT:

- Carpel Tunnel Syndrome
 - Plantar Fasciitis
 - Nerve Entrapments Symptoms
 - Peripheral Neuropathy
- and improve Blood Circulation

How ActiVessel works

Used in over 20,000 treatments in top clinics worldwide, ActiVessel is field-proven to reduce pain and accelerate the healing process for numerous conditions.

A UNIQUE COMBINATION

Combined Ultrasound and Electrical field stimulation (CUSEFS). Combines the two modalities and modulates them both individually and in combination during treatment period. The result of this unique activity alters the overall effect on the cellular structures and also modifies the directions of cellular and subcellular aggregation.

ActiVessel is the only technology that solves this penetration problem, enabling the treatment to remain effective for the entire session.

A proven effect of ultrasound is to stimulate fibroblasts to create collagen and also lay the new collagen in a more ordered pattern, resulting in a better weave for Epitheliasation. Electrostimulation is known to pull taut the fibroblasts and resultant collagen, yielding a stronger weave. The end result of using the two technologies is more ordered and tighter collagen weave. And ActiVessel is the only technology that solves this penetration problem.

ActiVessel ADVANTAGES:

- Can reduce excruciating pain in just 2-3 treatments
- Easily replaces surgery such as carpal tunnel release
- Offers stability to peripheral neuropathy patients

Patients who have used the quick-acting ActiVessel have reduced their pain medication intake and reported increased stability and improved quality of life.

ActiVessel unlocks the full power of therapeutic ultrasound

The benefits of ActiVessel at a glance:

- Reduced hospital readmission
- Increased quality of life
- Reduced pain medication usage
- Increased healing time

By increasing your residents' health, happiness and stability, your care facility will benefit tenfold – from increased reputation to reduced expenses.
